

TRUFIG

Flush by design

Every last detail

Great design is about attention to detail. Traditionally, technology compromises the flow and integrity of any space. There is very little consistency across industrial design, variations in color and sheen, standard or screwless faceplates, square or rounded corners. In addition, devices protrude out of the wall or ceiling creating distracting shadow lines. Unfortunately, code, safety and convenience dictate they be there.

Do they have to be such a visual intrusion?

Introducing
TRUFIG

Clean lines
without shadows

TRUFIG is a revolutionary design solution that allows technology to be mounted completely flush into the wall or ceiling.

Clean lines, without unattractive shadows compromising the flow of a space.

From floor to ceiling

TRUFIG delivers precision alignment and a consistent aesthetic across a variety of devices from different manufacturers. **TRUFIG** also allows them to blend discreetly into the environment without compromising the design vision of the space.

TRUFIG fascias can be painted, faux finished, wallpapered or laminated. Explore the versatility that allows you to customize each device to match any surface.

Invisibility through simplicity

With **TRUFIG** blank fascias you can hide those rarely-used devices and power outlets whose location is often dictated by code.

Reality from vision

The TRUFIG Mounting Platform

TRUFIG Mounting Platforms allow for a repeatable, high-quality result across multiple technologies and in a variety of installation surfaces. No more “one-offs” to hide outlets in base boards and back-splashes. The installation process incorporates traditional trade methods ensuring fast, error-free outcomes.

from different manufacturers

Air flow with style

There are HVAC vents and returns in nearly every room, protruding from the wall and ceiling, casting shadows and disrupting lines. Why not **TRUFIG** your registers, returns, and diffusers and provide air flow that is not only functional, but stylish.

A touch of class

Sonance Architectural Series® Speakers

Sonance Architectural Series® Speaker Systems utilize the same mounting process as **TRUFIG**, delivering a consistent and high quality flush-mount aesthetic. Available in round or square with a paintable microtrim grille, in 8" or 4" to perfectly compliment trim-less light fixtures.

Small, Medium, Large and Extra Large formats for Crestron® touch panels (TSW-750 shown)

iPad® (4th generation), iPad (3rd generation), iPad 2, iPad and iPad mini
